What CET Solves

Corporate ground transportation becomes difficult when trips involve VIPs, multiple destinations, vehicle types, time zones or events.

01 **Fragmented vendors**

Different providers, different standards and inconsistent follow-up.

02 **Last-minute changes**

Flight delays, itinerary shifts and new passengers create stress.

03 **Group complexity**

Sedans, SUVs, vans and coaches need one coordinated plan.

04 **Accountability gap**

Executives need a human contact when something changes.
